

**Clarification of Testing Site Information:** Under bullet point #3 from yesterday's post regarding public concerns, please note that the in-county testing sites, Hillsboro Area Hospital, St. Francis Hospital, and Litchfield Family Practice have differing protocols. Litchfield Family Practice currently is testing only established patients. Hillsboro Area Hospital and St. Francis Hospital can provide testing to the general public, however, certain criteria must be met. As for all three locations, please call ahead to discuss your situation. If they are not able to provide you with testing they should be able to refer you to another location. An alternate testing site that has no specific criteria requirements is Macoupin County Public Health Department's Maple Street Clinic located in Gillespie. They do ask that you schedule an appointment. Also, there are Walgreens in the area that are doing testing. We apologize for any confusion this may have caused.
